

PORTABLE

Lafferty Hood and Vent Foam Cleaning Systems

Work Faster. Work Smarter. Earn More.

Lafferty Precision Foamers for hood and vent cleaning apply high quality foam precisely where you want it, and are designed with the professional hood and vent cleaning company in mind. These systems help get the job started fast and save time, chemical and water. Everything required to undertake a precision foaming job is mounted to the cart. Just plug the unit into an electrical supply and provide the chemical solution.

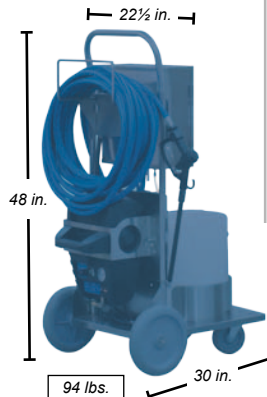

Features

- Precision Foamers create and project a low volume of rich foam and are ideal for jobs where precision application and tight control of overspray are required.
- The Portable Precision Foamer is a self-contained foaming system, complete with a small, on-board 110V air compressor.
- A Flojet air pump powers the system, and is mounted on a unique Lafferty quick release, stainless steel bracket inside a stainless steel enclosure.
- Adjustable foam consistency
- Consistent, efficient chemical control
- Draws ready-to-use chemical solution from a user-supplied pail

Benefits without high pressure water

- Dwell time of low pressure, clinging foam penetrates grease to leave a clean surface with less effort
- Reduces prep time — by up to 1 hour or more per location
- Lower mil, plastic sheeting can be used — Less cost, easier handling and disposal
- Less splatter during cleaning and rinsing — Less plastic needed; Easier cleanup
- Less rinsing required — Use up to 1/3 less water
- Frees up pressure washer to be used for other tasks

Model #	Description
935165	Portable PD Precision Foamer
710756	Viton Diaphragm upgrade for Flojet Air Pump

Requirements :

RTU chemical and electricity

Includes

- Stainless steel cart & enclosure
- Air compressor (110 volt)
- GFCI protected electrical connection
- Air pump with Santoprene diaphragm (Optional Viton)
- Stainless steel foamer body
- Discharge hose, polypropylene trigger gun and foam wand with stainless steel nozzle

Dimensions: 48 in. tall; 22½ in. wide; 30 in. deep – Weight: 94 lbs.
